

**(Acting) Returning Officers
Final Recommendations
Polling District and Polling Places Review
For the Borough of Runnymede
21 October 2019**

Paul Turrell
Returning Officer
Runnymede Borough Council
Civic Offices
Station Road
Addlestone
Surrey
KT15 2AH

ACTING RETURNING OFFICERS RECOMMENDATIONS

The recommendation is that the Polling Place for each polling district is coterminous with the polling district, apart from CR2, CR3, CR4, EH2, EH3, ET1, ET3, ET5, OS3, OS4, VW2, VW4 and WR3 where the proposed polling place will be coterminous with the proposed polling station. Below are listed all of the Polling Places in Runnymede Borough and the final recommendations from the (Acting) Returning Officer.

Polling Districts	Current Polling Station	Elector Count (as at 3 May 2019)	Recommendations	Proposed Constituency

Representations received

Councillor Isabel Mullens

I note that it is proposed that Polling Districts ET4 and ET5 continue to vote in the same polling place as each other (Egham Cricket Club) in non-parliamentary elections, and as they are both in the same ward, Egham Town Ward, that makes sense to me.

However, it is proposed that ET4 and ET5 vote in different (from one another) places in parliamentary elections, (ET4 – Egham Cricket Club, and ET5 – Band Hall), presumably because there is the possibility that our government will put into effect revised constituency boundaries, so that ET4 will be in Spelthorne constituency, and ET5 will be in Runnymede and Weybridge constituency. There is certainly a logic to this.

But I would like to express concern that as a consequence of these proposed changes, the 28 electors in ET5 will have to vote in different polling stations in different elections – in the Band Hall in parliamentary elections, and in the Cricket Club in local elections. This will doubtless lead to confusion, and to some people going to the wrong polling station, and potentially missing the chance to vote.

A possible solution to this is that the voters in ET5 should vote in the Band Hall in all elections. They would need to be informed of this change at the outset, but would benefit from the consistency of voting in the same place in future elections.

Response

Officers acknowledge that it would make sense for them to vote in the same polling station for all elections and recommend that this suggestion is taken forward.

Ron Enticott

1. District CR 4- ARC Drill Hall Road, the building has very limited parking and is in a road with limited parking. I do not think there is any provision for disabled parking and wonder whether it has suitable toilet facilities. It is also a potential target for terrorists and with ready access to the public makes this location vulnerable. I also feel that it is not a particularly pleasant working environment for those managing the count.
2. CS3 comments as in 1.

Response

We have visited the location and we are happy that it is suitable for use as a polling station.

Darley Dene

With reference to your email dated 06/09/2019 regarding a review of polling places, I would like to propose that you utilise the Addlestone Community Centre instead of Darley Dene Primary School.

The closure of the school for the day disrupts the children's learning especially as the first Thursday in May is so close to the KS1 and KS2 SATS exams. I believe that the Addlestone Community Centre was successfully used on the last polling day and therefore hope that you can consider using this venue going forward.

Reponse

Noted

St Ann's Heath Junior School

Would like to recommend, that an alternative to the school is considered for future elections.

Response

Officers have considered the recommendation and agree with the suggestion, so will relocate the electors to the Old Church Hall, Rear of Station Parade, Virginia Water.

Cllr Linda Gillham

Secondly we have long recognised that 4 polling stations in Thorpe ward is excessive. I would recommend disposing of Truss's Island and offering those residents the option of either joining the Penton Park community or travelling to Thorpe Village Hall.

It would seem with the increase in postal votes that it is less likely there will be people who have difficulty reaching either of these polling stations.

Response

Officers have considered the comment and reviewed the number of electors who are allocated to each polling station. Whilst the numbers for two of the polling stations in Thorpe Ward are on the low side of suggested parameters there are other factors such as geographical location which would justify the retention of four polling stations in this ward.

Polling Stations are used for not only local elections but for Parliamentary there is currently a review of Parliamentary Constituencies in progress. Officers have looked at the final recommendations of the proposals and note that if they were to be enacted a reduction in the number of Polling Stations as proposed would cause problems for some voters because they would have to attend different polling stations dependent on the type of election taking place. If a Parliamentary and Local election were combined this would require some electors to attend two different polling stations to cast their votes.

Thorpe Residents Assocation

TH3. We do not believe the Mobile Unit site should be relocated to the Junction of Wavendene Avenue/Thorpe Lea Road.

Response

Officers have received complaints from the householder who immediately adjoins the site in Ashleigh Avenue and the new location would move the unit a greater distance from properties than the Ashleigh avenue site.. Whilst officers note the comments re parking there is a greater amount of parking available on Wavendene Avenue and other roads in its proximity than in the previous location.

Thorpe Lea Road is heavily congested, there are many Heavy Goods Vehicles using the road, making the site quite dangerous and there is nowhere for voters to park, other than on Wavendene Avenue. Whilst the site at Ashleigh Avenue may not be as accessible we believe it to be the safer option.

TH2. At last night's meeting Cllr. Linda Gillham informed us that there may be a reduction in numbers of Polling stations and she had recommended the site at Truss's Island be removed. If this is a consideration we would strongly object. The site serves the residents of Chertsey Lane, Temple Gardens, Aymer Drive, Green Lane, Mayfield Gardens, Thames Retreat, Bundy's Way and Timsway. It fulfils the criteria of Location – there is a regular bus route, there is ample parking, an island in the middle of the A320 for safe crossing, and it serves (currently) 1138 voters, the second highest in the ward. Many of the residents are able to walk to the polling station. If, as suggested by Cllr. Gillham, the Polling station for these residents were to be moved to Thorpe Village Hall, it would increase the carbon footprint because every resident would have to drive there, there are fewer parking spaces and no bus route from the A320. We wonder how many people would bother.

Response

Please see the above response to Councillor Gillham's comments
