L	INVERT LEVEL	WO	WASH OUT

General.
 This survey has been prepared with a scaling accuracy for a plot at a scale of 1:200.
 All tree heights and spreads are approximate. We have tried to identify tree types, however if tree species are critical specialist advice should be gained.
 Drainage pipe sizes have been measured from the surface. Chamber access has not been gained for safety reasons, therefore sizes should be regarded as approximate.
 Some detail may have been omitted due to parked vehicles.

Notes.
 Coordinates related to OS National Grid from ST05 by GPS (No scale factor added). Levels related to ODS.
