Housing Committee Note

During the year the Council pays out around £14.6m in housing rent allowances to private sector tenants. This works out at approximately £1.2m per month. This expenditure is coded directly to the Housing Committee expenditure codes. The subsidy that the Council receives (about £22m in 2015/16) is held in a central control account until the end of the year when all of the year end costs are available and the annual subsidy reconciliation is carried out. At this time, the Council establishes the appropriate sums for the subsidy receivable for council tax and rent rebate benefits and allocates them accordingly.

The budget has been profiled to take account of these factors and therefore the profiled budget column above increases beyond the annual budget by approximately £1.2m each month to mirror the expected pattern of the expenditure. The year end profile then returns to the original budget in anticipation of the allocation of the subsidy receipt.

As the year progresses it appears that the Council's housing costs increase
